XGA Projectors

CASSIOPEIA® PRO

Casio Mobile Presentation Solutions

The Casio XJ-350 Mobile XGA Projector

weighs 3.96 lbs, 200% optical zoom features Auto Vertical Keystone Correction and puts out an amazing 2200 ANSI Lumens. Enough Lumens to keep the lights on during the presentation, invaluable for people taking notes. Casio has drawn upon its expertise in the miniaturization of consumer electronics to create a bright mobile projector that is a leader in size/performance ratio. At about the size of a hard cover book, it fits easily into your brief case or carry-on-luggage.

Under 4 lbs, 2200 ANSI Lumens and 200% Optical Wide Zoom

200% optical zoom enables you to fill a 60 inch screen in an office that's less than 6 feet deep. An important feature for those one on one presentations or when the meeting room space limits the image size capabilities of other projectors offering 20% zoom.
